## OBJECTIVE

The purpose of Science exhibitions is to develop scientific attitude in the young generation of our country to make them realize the interdependence of science, technology and society and the responsibility of the scientists of tomorrow. These objectives may be achieved by presenting the exhibits as an exciting experience of creativity of children, innovations through improvisations of science kits, and various devices and models for

providing solutions to many present and future socio-economic problems particularly those confronted in the rural areas, using available materials and local resources.

The exhibitions will help students and teachers to learn from each other experiences and motivate them to design and develop something new and novel. It will also provide a medium for popularizing science and increasing awareness among the public towards it.
