PROFESSIONAL ENGLISH I

(Common to All Branches)

SEMESTER I

L	T	P	C
3	0	0	3

COURSE OBJECTIVES:

- To develop learners' core communication skills in LSRW, grammar, and vocabulary.
- To help learners use language effectively in academic /work contexts.
- To enhance learners' ability to understand, present, read, and write product-related information using correct grammar and vocabulary.
- To use language efficiently in expressing their opinions via various media.
- To develop learners' ability to read and write complex texts, articles, definitions and essays.

UNIT-I: INTRODUCTION TO FUNDAMENTALS OF COMMUNICATION 9

Listening-understanding listening and listening techniques; listening comprehension.

Speaking-introducing oneself; asking for information to fill details in a form.

Reading- skimming-scanning; speed reading.

Writing – AI assisted email writing; letter writing-permission/accepting/declining.

Grammar - parts of speech-tense-present.

Vocabulary – word formation; abbreviations & acronyms.

UNIT-II: NARRATION AND SUMMATION 9

Listening-listening conversation-note taking.

Speaking - narrating personal experiences; small talk.

Reading - reading comprehension-advertisements- cloze reading.

Writing - minutes of the meeting, short report on an event (field trip etc.).

Grammar –tense-past; articles.

Vocabulary – one-word substitution; synonyms and antonyms.

UNIT-III: DESCRIPTION OF A PROCESS / PRODUCT 9

Listening – listen to a product and process descriptions and advertisements about a products.

Speaking – presentation-PPT slides/project/innovative products; advertising a product.

Reading – reading and comparing different product specifications-reviews; user manuals.

Writing - writing definitions; instructions; and paragraph writing.

Grammar - tense-future- question types: wh/yes or no/ and tags.

Vocabulary - compound words, homonyms; and homophones.

UNIT-IV: CLASSIFICATION AND RECOMMENDATIONS 9

Listening – technical presentation-video clips and answering questions.

Speaking – welcome address-vote of thanks; interviewing a celebrity.

Reading – newspaper articles; responding to instant messages.

Writing – note-making; recommendations; transferring information (tables, chart, graph etc.).

Grammar –subject verb agreement-error correction.

Vocabulary - transition words- sentence completion.

UNIT-V: EXPRESSION 9

Listening – listening to debates and panel discussions.

Speaking –debate & role play activities.

Reading – reading editorials; newspaper report.

Writing – essay writing (descriptive or narrative) - discourse markers.

Grammar – degrees of comparison.

Vocabulary – idioms - phrasal verbs.

COURSE OUTCOMES: Upon completion of this course, the students will be able to:		Bloom's Level
CO1:	Communicate effectively using proper language skills in academic and real-life situations.	K3 (Applying)
CO2:	Comprehend, articulate, interpret, and produce structured communication with accuracy and clarity.	K3 (Applying)
CO3:	Communicate technical and product information clearly and effectively.	K1 (Remembering)
CO4:	Comprehend technical and general content, communicate effectively in formal and informal contexts.	K2 (Understanding)
CO5:	Express their opinions effectively in both oral and written medium of communication.	K3 (Applying)

MATRICES AND CALCULUS
(Common to all Branches)

SEMESTER I			
L	T	P	C
3	1	0	4

COURSE OBJECTIVES:

- To obtain the knowledge of eigen values and diagonalization of a matrix.
- To obtain the knowledge of various Matrix decomposition Techniques
- To acquire knowledge of differentiation for more than one variable and its applications.
- To obtain the knowledge of various techniques of integration.
- To acquire the knowledge of multiple integration and related applications.

UNIT-I: MATRICES

9+3

Eigen values and Eigenvectors of a real matrix - Characteristic equation - Properties of Eigen values and Eigenvectors - Cayley - Hamilton theorem - Reduction of a quadratic form to canonical form by orthogonal transformation.

UNIT-II: MATRIX DECOMPOSITION

9+3

QR decomposition - Singular Value Decomposition (SVD) - Least Square solutions - simple problems (up to 3×3 matrices).

UNIT-III: DIFFERENTIAL CALCULUS

9+3

Partial differentiation - Jacobians - Taylor's series for functions of two variables - Maxima and minima of functions of two variables - Lagrange's Method of undetermined multipliers.

UNIT-IV: INTEGRAL CALCULUS

9+3

Definite and Indefinite integrals - Substitution rule - Techniques of Integration: Integration by parts - Trigonometric Substitution - Integration of rational functions by partial fraction.

UNIT-V: MULTIPLE INTEGRALS

9+3

Double integrals - Change of order of Integration - Area enclosed by plane curves - Triple integrals - Volume of solids (Sphere, Cylinder and tetrahedron only).

5. Jain, R. K., & Iyengar, S. R. K., “Advanced Engineering Mathematics”, 5th Edition, Narosa Publications, New Delhi, 2016.

COURSE OUTCOMES:

Upon completion of this course, the students will be able to:		Bloom's Level
CO1	Understand the matrix algebra techniques for solving practical problems	K2 (Understanding)
CO2	Understand the concepts of decomposition of matrices	K2 (Understanding)
CO3	Apply differential calculus ideas on several variable functions	K3 (Applying)
CO4	Apply different method of integration in solving practical problems	K3 (Applying)
CO5	Apply multiple integrals ideas in solving areas and volumes and other practical problems	K3 (Applying)

COs-POs & PSOs MAPPING:

CO5	3	2	1	1	-	-	-	-	1	1	1		
AVG	3.0	2	1	1	-	-	-	-	1.0	1.0	1.0		

COURSE OBJECTIVES:

- To impart knowledge on the fundamental concepts of elasticity, bending of beams, and their structural engineering applications.
- To explain the principles of heat transfer, rectilinear flow, and experimental methods to measure thermal conductivity.
- To introduce the formulations of quantum mechanics, wave equations, and the behavior of particles in microscopic domains.
- To familiarize with the basics of quantum computing, qubits, Bloch sphere representation, and foundational quantum logic gates.
- To understand the principles of architectural acoustics, production of ultrasonic waves, and their non-destructive and medical testing applications.

UNIT-I: PROPERTIES OF MATTER**9**

Elasticity- Hooke's law - Classification of Modulus of Elasticity- Poisson's Ratio - Stress-Strain diagram - Factors affecting elasticity - Moment, Couple and Torque - Derivation of Twisting Couple on a wire - Bending moment - Depression of a cantilever - Young's modulus by Uniform Bending – Non-Uniform bending - I shaped girders and its applications.

UNIT-II: THERMAL PROPERTIES**9**

Thermal Conductivity - Thermal Diffusivity - Specific Heat Capacity - Rectilinear Flow of Heat along a Uniform Bar - Heat conduction through compound media (Series and Parallel) - Determination of Thermal Conductivity of a Good Conductor by Forbe's Method: theory and experiment - Determination of Thermal Conductivity of a poor Conductor by Lee and Charlton's Disc Method: theory and experiment.

UNIT-III: QUANTUM MECHANICS**9**

Limitations of classical Physics - Introduction to Quantum theory - Dual nature of matter and radiation - Properties of matter waves - de Broglie wavelength in terms of voltage, energy, and temperature - Heisenberg's Uncertainty principle - physical significance of wave function - Schrodinger's Time independent and Time dependent wave equations - Particle in a one-dimensional potential well.

UNIT-IV: QUANTUM COMPUTING**9**

Introduction to Quantum Computing - Moore's law and its limitations - Differences between Classical and Quantum computing- Concept of qubit and its properties - Representation of qubit by Bloch sphere - Single and Two qubits Quantum devices - Qubit Gates, Single Qubit Gates: Quantum NOT Gate - Pauli - X, Y and Z Gates - Hadamard Gate - Phase (S) Gate, T Gate.

UNIT- V: ACOUSTICS AND ULTRASONICS**9**

Acoustics: Classification of Sound - Weber-Fechner law - Absorption coefficient and its determination - Factors affecting acoustics of buildings and their remedies.

Ultrasonics: Production of ultrasonics - magnetostriction and piezoelectric methods - Non Destructive testing: pulse echo system through transmission and reflection modes - Medical application: Sonogram.

5. Charles Kittel, Introduction to Solid State Physics, Wiley India Edition, 2019.

COURSE OUTCOMES:

Upon completion of this course, the students will be able to:		Bloom's Level
CO1	Apply the concepts of elasticity and bending moments to analyze deformations in cantilevers, beams, and structural components like I-shaped girders.	K3 (Applying)
CO2	Understand the heat conduction through uniform and compound media, and their thermal conductivity.	K2 (Understanding)
CO3	Solve quantum mechanical problems using Schrödinger's time-dependent and independent wave equations.	K3 (Applying)
CO4	Understand difference between classical and quantum computing systems and the operations of single-qubit quantum gates.	K2 (Understanding)
CO5	Apply the acoustic parameters of buildings for noise control and application of ultrasonic waves in medical imaging and non-destructive testing (NDT).	K3 (Applying)

L	T	P	C
1	0	4	3

COURSE OBJECTIVES:

The main learning objective of this course is to prepare the students to:

- Construct various conic curves, cycloids, involutes, tangents and normals using appropriate graphical methods.
- Apply the principles of orthographic projection to represent points, lines and three-dimensional objects.
- Develop projections of plane surfaces and simple solids using suitable projection methods.
- Construct sectional views and develop the surfaces of simple and sectioned solids.
- Apply the principles of isometric projection to represent simple and truncated solids and visualize three-dimensional objects.

CONCEPTS AND CONVENTIONS (Not for Examination)

Importance of graphics in engineering applications – Use of drafting instruments – BIS conventions and specifications – Size, layout and folding of drawing sheets – Lettering and dimensioning.

UNIT-I PLANE CURVES**3+12**

Basic Geometrical constructions, Curves used in engineering practices: Conics – Construction of Ellipse, Parabola and Hyperbola by eccentricity method – Construction of Cycloid – Construction of involutes of circle – Drawing of tangents and normal to the above curves.

UNIT-II ORTHOGRAPHIC PROJECTION OF POINTS, LINES AND 3D OBJECTS**3+12**

Principal planes – First angle projection – Projection of points. Projection of straight lines (only First angle projections) inclined to both the principal planes – Determination of true lengths and true inclinations by rotating line method and traces. Visualization concepts – Visualization principles – Representation of Three Dimensional objects – Layout of views – Sketching of multiple views from pictorial views of objects.

UNIT-III PROJECTION OF PLANE SURFACES AND SOLIDS**3+12**

Projection of polygonal plane surfaces inclined to both the principal planes by rotating object method – Projection of simple solids like Prisms, Pyramids, Cylinder and Cone when the axis is inclined to one of the principal planes and parallel to the other by rotating object method.

UNIT-IV PROJECTION OF SECTIONED SOLIDS AND DEVELOPMENT OF SURFACES**3+12**

Sectioning of solids in simple vertical position when the cutting plane is inclined to the one of the principal planes and perpendicular to the other – Obtaining true shape of section.

Development of lateral surfaces of simple and sectioned solids: Prisms, Pyramids, Cylinder and Cone.

UNIT – V ISOMETRIC PROJECTIONS

3+12

Principles of Isometric projection – Isometric scale – Isometric projections of simple solids and truncated solids: Prisms, Pyramids, Cylinder and Cone – Conversion of orthographic views to pictorial views (Simple objects), Hybrid modelling workflows (Demonstration Only).

5. Kulkarni D.M., Rastogi A.P. and Sarkar A.K., “Engineering Graphics with AutoCAD”, PHI Learning, 2nd Edition, 2017.

COURSE OUTCOMES:

Upon completion of this course, the students will be able to:		Bloom’s Level
CO1	Construct the conic curves, involutes and cycloid.	K3 (Apply)
CO2	Solve practical problems involving orthographic projection of points, lines and 3D objects.	K3 (Apply)
CO3	Draw the projections of plane surfaces and simple solids.	K3 (Apply)
CO4	Draw the section of solids and the development of simple solids	K3 (Apply)
CO5	Draw the isometric projections of simple solids and sketching of 3D objects	K3 (Apply)

Special points applicable to End Semester Examinations on Engineering Graphics:

1. There will be five questions, each of either or type covering all units of the syllabus.
2. All questions will carry equal marks of 20 each making a total of 100.
3. The answer paper shall consist of drawing sheets of A3 size only. The students will be permitted to use appropriate scale to fit solution within A3 size.
4. The examination will be conducted in appropriate sessions on the same day.

COURSE OBJECTIVES:

- Implement computer fundamentals and structure logical solutions using C.
- Develop programs using control structures and arrays.
- Analyze modular and pointer-based techniques for efficient code design.
- Implement user-defined data types and memory management techniques.
- Apply file handling techniques for persistent data storage.

UNIT-I: BASICS OF C PROGRAMMING 11

Generation and Organization of Computers - Number System - Binary - Decimal - Conversion - Problems. Need for logical analysis and thinking - Algorithm - Pseudo code - Flow Chart. Introduction to programming paradigms: Structure of C program - Data Types - Constants - Keywords - Operators and Expressions - Input / Output statements.

UNIT-II: ARRAYS AND STRINGS 9

Decision making statements - Switch statement - Looping statements - Arrays - Initialization - Declaration - One dimensional, Two dimensional arrays - String: String operations - String Arrays - Simple programs: Sorting - Searching - Matrix operations.

UNIT-III: FUNCTIONS AND POINTERS 9

Introduction to functions: Function prototype, function declaration, function definition, function call, Built-in functions (string functions, math functions) - Recursion - Pointers - Pointer operators - Pointer arithmetic - Arrays and pointers - Array of pointers - Parameter passing: Pass by value, Pass by reference- Storage classes and Visibility.

UNIT-IV: STRUCTURES AND UNION 9

Structure - Nested structures – Pointer and Structures – Array of structures – Self referential structures – Dynamic memory allocation: malloc(), calloc(), realloc(), free() - Singly linked list – typedef – Union.

UNIT-V: FILE PROCESSING 7

Files: File opening modes - File operations: Open, Read, Write, Close - Sequential access, Random access – Common errors in the file handling- File Pointers: ftell(), fseek(), rewind()- Preprocessor directives - Command line arguments.

26CAHS109

HERITAGE OF TAMILS

SEMESTER I

L	T	P	C
1	0	0	1

UNIT-I: LANGUAGE AND LITERATURE

3

Language Families in India - Dravidian Languages – Tamil as a Classical Language - Classical Literature in Tamil – Secular Nature of Sangam Literature – Distributive Justice in Sangam Literature Management Principles in Thirukural - Tamil Epics and Impact of Buddhism & Jainism in Tamil Land Bakthi Literature Azhwars and Nayanmars - Forms of minor Poetry - Development of Modern literature in Tamil - Contribution of Bharathiyar and Bharathidhasan.

UNIT-II: HERITAGE - ROCK ART PAINTINGS TO MODERN ART – SCULPTU

3

Hero stone to modern sculpture - Bronze icons - Tribes and their handicrafts - Art of temple car making - - Massive Terracotta sculptures, Village deities, Thiruvalluvar Statue at Kanyakumari, Making of musical instruments - Mridhangam, Parai, Veenai, Yazh and Nadhaswaram - Role of Temples in Social and Economic Life of Tamils.

UNIT-III: FOLK AND MARTIAL ARTS

3

Therukoothu, Karagattam, Villu Pattu, Kaniyan Koothu, Oyillattam, Leather puppetry, Silambattam, Valari, Tiger dance - Sports and Games of Tamils.

UNIT-IV: THINAI CONCEPT OF TAMILS

3

Flora and Fauna of Tamils & Aham and Puram Concept from Tholkappiyam and Sangam Literature - Aram Concept of Tamils - Education and Literacy during Sangam Age - Ancient Cities and Ports of Sangam Age - Export and Import during Sangam Age - Overseas Conquest of Cholas.

UNIT-V: CONTRIBUTION OF TAMILS TO INDIAN NATIONAL MOVEMENT AND INDIAN CULTURE

3

Contribution of Tamils to Indian Freedom Struggle - The Cultural Influence of Tamils over the other parts of India – Self-Respect Movement - Role of Siddha Medicine in Indigenous Systems of Medicine – Inscriptions & Manuscripts – Print History of Tamil Books.

TOTAL : 15 PERIODS

26CAES106	C PROGRAMMING LABORATORY	SEMESTER I			
		L	T	P	C
		0	0	3	1.5
COURSE OBJECTIVES:					
• Outline control and iterative logic to build decision-driven C programs. • Develop modular, memory-efficient solutions using data organization and addressing. • Design real-world team applications using persistent storage and quality practices. • Analyze modular and memory-oriented programming techniques for efficient problem solving. • Apply data organization and file-handling techniques to develop efficient solutions.					
LIST OF EXPERIMENTS:					
1. I/O statements, operators, expressions 2. Decision-making constructs: if-else, goto, switch-case, break-continue 3. Loops: for, while, do-while 4. Arrays: 1D and 2D, Multi-dimensional arrays, traversal 5. Strings: operations 6. Functions: call, return, passing parameters by (value, reference), passing arrays to function. 7. Recursion 8. Pointers: Pointers to functions, Arrays, Strings, Pointers to Pointers, Array of Pointers 9. Structures: Nested Structures, Pointers to Structures, Arrays of Structures and Unions. 10. Files: reading and writing, File pointers, file operations, random access, processor directives. 11. Mini Project : Library Management, Hospital Management System, Banking Application, Inventory Management, Ticket Reservation, Student Attendance Maintenance, Restaurant Billing, Employee Management, College Course Registration System, Supermarket Billing Process, Hotel Reservation application, Currency Convertor.					
Contact Periods:					
Lecture: 0 Periods	Tutorial: 0 Periods	Practical: 45 Periods	Total: 45 Periods		

COURSE OUTCOMES:

Upon completion of this course, the students will be able to:		Bloom's Level
CO1	Illustrate core programming concepts and constructs for solving computational problems.	K2 (Understand)
CO2	Apply control and iterative logic to build decision-driven solutions.	K3 (Apply)
CO3	Analyze modular and memory-addressing techniques for efficient problem solving.	K4 (Analyze)
CO4	Create efficient software solutions using structured data and persistent storage.	K6 (Create)
CO5	Demonstrate programming skills through individual or team-based application development.	K6 (Create)

LIST OF EQUIPMENT'S AND COMPONENTS

- Software Required – Turbo C Compiler / GNU C Compiler / Equivalent
- Operating System – Windows 7 / 8.1 / 10 / Linux
- Computers Required – 30 Nos.

COURSE OBJECTIVES:

The main objective of this course is to provide students in basic engineering practices and develop their practical skills through work shop based activities to:

- Provide hands-on training in plumbing and sheet-metal fabrication practices.
- Develop practical skills in carpentry using basic hand tools and workshop techniques.
- To understand electrical installation, wiring, and solar measurement practices.
- To develop skills in electrical safety, wiring, and solar measurement.
- To develop skills in identifying electronic components, soldering, and computer assembly.

GROUP – A (CIVIL & MECHANICAL)**PART I CIVIL ENGINEERING PRACTICES**

1. Plumbing Practice: Basic Introduction –Pipe fittings –Valves, Taps, Couplings, Unions, and Elbows and practical applications of plumbing.
2. Fabrication of Sheet Metal practices.
3. Carpentry Practice: Making a basic wood joint.

PART II MECHANICAL ENGINEERING PRACTICES

1. Welding Practice: introduction to welding –Safety – Arc Welding and Welding Joints.
2. Foundry Practice: Green Sand Molding – Core Preparation – Pattern Shrinkage (Demonstration only).

Contact Periods:

Lecture: 0 Periods Tutorial: 0 Periods Practical: 24 Periods Total: 24 Periods

GROUP – B (ELECTRICAL & ELECTRONICS)**PART III ELECTRICAL ENGINEERING PRACTICES**

1. Study of Electrical Installation tools, equipment & safety measures.
2. Residential house wiring and Staircase wiring.
3. Measurement of voltage and current using solar panel.

PART IV ELECTRONIC ENGINEERING PRACTICES

1. Study of Electronic Components and Equipment: Resistor Colour Coding, and Soldering Practices.
2. Dis-assembly and assembly of computers.

Contact Periods:**Lecture: 0 Periods****Tutorial: 0 Periods****Practical: 21 Periods****Total: 21 Periods****Overall Total: (Group A: 21 + Group B: 24) Total: 45 Periods****COURSE OUTCOMES:****Upon completion of this course, the students will be able to:**

CO	Course Outcome Description	Knowledge Level
CO1	Assemble pipe fittings for a Plumbing line and fabricate a sheet metal tray.	K3 (Apply)
CO2	Construct a basic wood joint using appropriate carpentry hand tools and workshop techniques.	K3 (Apply)
CO3	Perform electrical installation, wiring, and solar measurements safely.	K3 (Apply)
CO4	Apply electrical safety practices and measure solar panel parameters.	K3 (Apply)
CO5	Identify electronic components, perform soldering, and assemble computers.	K3 (Apply)

COs-POs &PSOs MAPPING:

COURSE ARTICULATION MATRIX

CO 3	3	-	-	-	-	-	1	-	2	-	-	2	-
CO 4	3	-	-	-	2	2	-	2	2	-	-	-	2
CO 5	3	-	-	-	2	-	-	-	2	-	-	-	2
Avg.	3	-	-	-	2	2	1	2	2	-	-	2	2

COURSE OBJECTIVES:

- Enhance the employability and career skills of students
- Orient the students towards grooming as a professional
- Make them Employability Graduates
- Develop their confidence and help them attend interviews successfully.
- Demonstrate an understanding of job applications and interviews for internship and placements.

LIST OF EXPERIMENTS:

1. Listening & Answering to a Lecture
2. Giving & asking personal information
3. Reading Comprehension
4. Oral presentation
5. Editing E-mail Writing using AI
6. Job Application Letter with Resume
7. Group Discussion
8. Soft Skills
9. Mock Interview
10. Digital portfolio presentation

Contact Periods:**Lecture: 0 Periods****Tutorial: 0 Periods****Practical: 30 Periods****Total: 30 Periods****REFERENCES:**

COURSE OUTCOMES:

Upon completion of this course, the students will be able to:		Bloom's Level
CO1	Recall and demonstrate the fundamentals of effective listening and self-introduction skills for academic and professional communication.	K1 (Remembering)
CO2	Explain and demonstrate reading comprehension strategies and presentation techniques for effective communication.	K2 (Understanding)
CO3	Apply professional writing skills to prepare effective e-mails, job application letters, and resumes for employment opportunities.	K3 (Applying)
CO4	Apply interpersonal communication, group discussion, and soft skills to interact effectively in professional environments.	K3 (Applying)
CO5	Apply interview techniques and career planning strategies to enhance employability and placement readiness.	K3 (Applying)
